AUDIO TRIODE

The Phædrus Audio AC701 is suitable for direct replacement of the AC701 (AC701k) tube in microphones employing this tube: see technical specification below. For more information and enquiries, email sales@phaedrus-audio.com.

The Phædrus Audio AC701 is supplied with long 38mm leads. This enables the tube to be fitted in all applications of the AC701 (AC701K) with the appropriate lead-dress.

The body of the Phædrus Audio AC701 is a cylinder. There is no taper for the grid connection as in there is in the Telefunken part. For that reason, the Phædrus Audio AC701 is shorter by 5mm than the Telefunken part. This makes it an easy fit, even in the tightest applications of the AC701(k). The electrodes are marked on the base of the tube, so that lead-identification is straightforward.

If a repair or replacement is required, we will issue a Return Merchandise Authorization (RMA) number and tell you where to send the unit to be repaired. You **MUST** have an RMA number before you return the equipment to Phaedrus Audio's support service. Phaedrus Audio will not accept responsibility for loss or damage in shipping or for equipment returned without valid paperwork and/or a valid RMA number. Remember, warranty is void if product serial numbers have been removed or altered, or if the product has been damaged by abuse, accident or unauthorized modification and/or repair. There are no user serviceable parts inside.

PLEASE RETAIN YOUR SALES INVOICE. IT IS YOUR PROOF OF PURCHASE COVERING YOUR LIMITED WARRANTY. LIMITED WARRANTY IS VOID WITHOUT SUCH PROOF OF PURCHASE.
